Positive to +
Negative to -

Step 8

Plug in power supply and secure with screw. Flip bracket upside for decor style plugs.

Step 9

Tilt panel upward onto back plate until it snaps in place

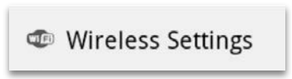
Step 10

Replace retainer screw and tighten

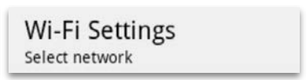
STEP 2: CONNECT WI-FI

Settings

System Settings



Touch "Wireless Settings"



Touch "Wi-Fi Settings"

Select the desired network.

Enter Wi-Fi password if required.

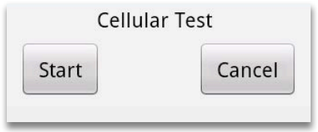
**Requires Installer code, default is "1111"*

STEP 3: RUN A CELL TEST

Settings

System Tests

Cellular Test



Touch "Start" to begin the test

Successful results will initiate a panel download from the Alarm.com servers, like date, local time, weather, etc., and begins syncing your company's contact info & template settings. Alarm.com account must be created prior to test.

STEP 4: CHECK FOR SOFTWARE UPDATES

Settings

Installation

Upgrade Software

Touch "Upgrade using Network"

If update is available it will download and install automatically. Once complete, touch "OK" to restart the panel.*

NOTE: Download could take could take up to 3 minutes, depending on your connection speed. After the panel re-starts **DO NOT TOUCH THE PANEL for 5 minutes to allow the software to fully install.*

STEP 5: PAIR SECURITY & LIFE SAFETY SENSORS

Settings

Installation

Security Sensors

AutoLearn Sensor

"Tamper" Sensor
Typically done by opening case, see manual for specifics

The panel will chime and a message will appear.
Touch "OK"

Select a quick name or custom.

Touch "Add"

***NOTE**: Image Sensors are placed in "pairing mode" by removing and replacing the batteries. See installation manual for details.*

STEP 6: PAIR Z-WAVE DEVICES

Settings

Installation

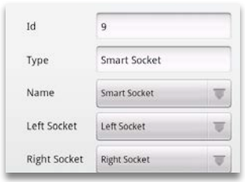
Home Control Devices

Add Device

Touch "Pair"

The panel will begin "looking" for devices

Press "Learn" button on device



Device information appears automatically. Edit as desired.

Touch "Add" to complete the pairing process.

NOTE: If the device does not learn in you may need to "Clear Device" first. See installation manual for detailed steps
