

# SecureNet Next Generation Video

## Sharper, Higher Definition

Experience the image quality difference with true high definition 1080 (2MP) or 720 (1MP) resolution video. View live streaming and playback at 30 frames per second, from anywhere in the world on your smart device or computer.

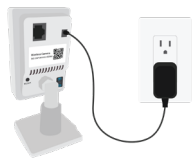

## Simple DIY Camera Setup

Setup and manage cameras directly within the app. The built-in installation wizard guides you through the simplified camera setup process.

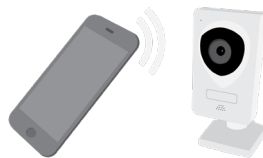

1

Scan the QR code to register the camera to your account

2

Plug in and power up the camera. Optionally connect via Ethernet.

3

Use the speaker in your phone to audibly push your Wi-Fi settings to the camera.\*

\*Outdoor cameras require temporary Ethernet connection to learn in Wi-Fi.

Cameras require a local network and connect via Wi-Fi or Ethernet. No additional gateway devices are required.

### Wi-Fi® Enabled

Connect to your local network via Wi-Fi or directly via IP/Ethernet.

### Built-in Mic and Speaker

2-way audio included on all indoor camera models. Converse through the camera while viewing live video.

### Night Vision

All cameras include night vision, featuring up to 22 LEDs and a range of up to 20m.

### Pan/Tilt Control

Easily swipe on live playback to adjust the camera's field of vision on supported pan/tilt models.

## Fully Integrated Recording Playback

Seamlessly playback recordings at full quality and frame rate on your device or computer.

### Event Recordings

All event recordings are stored securely in the cloud. Receive instant notifications to review security triggered recordings.

### Trigger Recordings with Recipes

Create recipes in the app and set cameras to record automatically on security, sensor, device or time scheduled events.

### Local Constant Recording

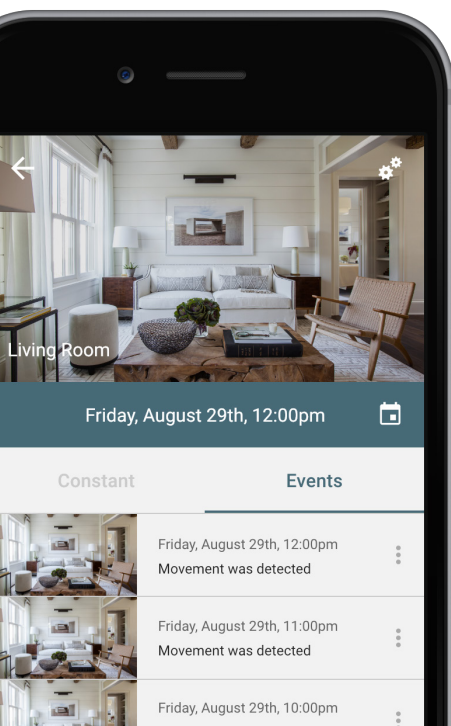

Store up to 7 days continuous recording in the camera MicroSD™ card\*\*. Outdoor cameras include a built-in 64GB MicroSD card.

### Manage Recordings

Search recordings with the calendar and time filters. Easily download and save event recordings to your device or computer.

\*\*Constant recording storage varies based on the MicroSD card capacity, camera settings and environment.

Some features on this page are not supported on the doorbell camera. Refer to specification on reverse for detailed information.
