

INSTALLATION NOTICE

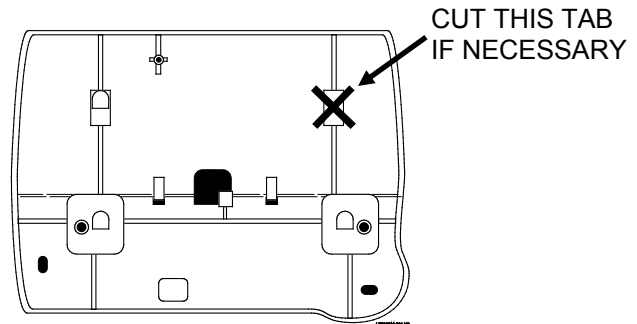

L7000DM Desk Mount

Desktop Mounting

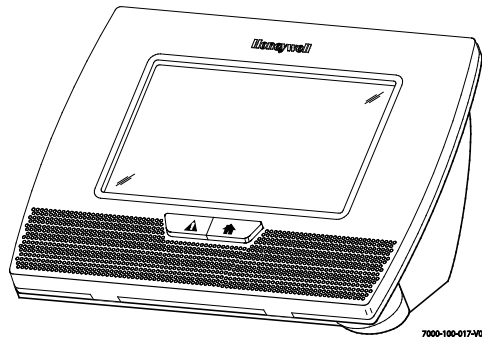

For desktop mounting of the LYNX Touch, use the optional mounting base model L7000DM.

1. Slide the control panel onto the mounting base locking tabs.

NOTE: On certain units, the tabs on the desk mount may not fully align with the slots in the LYNX Touch back case. If necessary, cut off the upper right-hand tab on the desk mount so the LYNX Touch is secured with three of the four tabs.

2. Bring all wiring through the bottom of the mounting base, using one of the wire entry locations, before making connections to the control panel.
3. Use tie-wraps to secure the wiring to the built-in wire loops as needed.
4. Use the supplied screws to secure the control panel to the mounting base.
